WORK EXPERIENCE

SALESFORCE VIRTUAL INTERNSHIP   **May 2025 – July 2025**

- o   Completed a structured Salesforce Developer virtual internship, gaining hands-on experience through instructor-led sessions and guided projects.
- o   Worked on real-world scenarios using a step-by-step Kanban-based project flow, improving practical understanding of Salesforce development tools and workflows.
- o   Collaborated with mentors via project workspaces, consistently updating task progress and submitting deliverables through GitHub for professional review.
- o   Completed a capstone project showcasing Salesforce development skills, including customizations, automation, and documentation aligned with industry standards.

PROJECTS

Fund4Edu | React.js, Firebase | LINK   **March 2025 – May 2025**

- o   Built an education funding platform that allowed students to submit verified funding requests and track donation progress in real time.
- o   Integrated Firebase authentication, Firestore database, to ensure secure data handling and seamless user experience.
- o   Designed and implemented an admin dashboard to review, approve, or reject funding requests with reason tracking.
- o   Enhanced transparency and donor engagement through live progress indicators and visualized donation status.

Portfolio Website | React.js, Bootstrap | LINK   **Dec 2024 – Jan 2025**

- o   Developed a fully responsive personal portfolio to display projects, technical skills, and contact information with a clean, elegant interface.
- o   Employed React components and Bootstrap for modular, mobile-first design with smooth scrolling and section-based navigation.
- o   Created an interactive and professional platform to showcase technical growth and project contributions.

Multi – Fusion Convert | HTML, CSS, JavaScript | LINK   **Oct 2024 – Nov 2024**

- o   Engineered a web application to convert units across multiple categories such as length, weight, and temperature with real-time accuracy.
- o   Implemented responsive design with fluid layout and intuitive UI using vanilla JavaScript and CSS transitions.
- o   Enabled users to switch between unit types dynamically without page reload, improving usability and interaction flow.
